### JEWELRY PHOTOGRAPHY FOR WEDDING PHOTOGRAPHERS

In this course, you'll learn how to take studio-quality photographs of wedding jewelry using just your camera and a speedlite (on-camera flash). Find out how to get professional shots without the use of a tripod or studio lighting. You won't even need Photoshop – we'll show you how to take pictures that look great even without any post-production!

Your final assignment will be reviewed and critiqued by Alex, who will provide the detailed feedback you'll need to take your work to the next level and make your portfolio stand out from the crowd.

Your clients will love having the beauty of their wedding/engagement rings captured in such a professional way!
